Education

2025 – 2027
Karachi, Pakistan

M.S in Data Science
Mohammad Ali Jinnah University
I am currently pursuing a Master of Science (M.S.) in Data Science, expected to be completed in 2027. Throughout my academic journey, I have developed a strong foundation in machine learning, database management systems, and a wide range of data science tools and techniques.In addition, I have gained solid expertise in statistical and mathematical methods essential for data analysis and modeling. I am proficient in programming languages such as Python and SQL, which I regularly use for data manipulation, analysis, and building data-driven solutions.

2020 – 2024
Karachi, Pakistan

B.S in Physics
Federal Urdu University of Arts, Sciences & Technology
I completed my Bachelor of Science (B.S.) in Physics in 2024 from the Federal Urdu University of Arts, Sciences & Technology. During my studies, I developed a strong foundation in core scientific and analytical subjects, including Calculus, Linear Algebra, and Computational Physics.I also gained knowledge in computer fundamentals and their applications in scientific problem-solving. This academic experience strengthened my analytical thinking, problem-solving abilities, and understanding of mathematical modeling and computational techniques.

Courses

Machine Learning
Mohammad Ali Jinnah University

Database Management System
Mohammad Ali Jinnah University

Tools and Techniques for Data Science
Mohammad Ali Jinnah University

Skills

Python
Proficient in Python for data analysis, automation, and problem-solving, with hands-on experience using libraries such as NumPy, Pandas, and Matplotlib. Skilled in writing clean, efficient code and applying Python to real-world projects, including data analysis, web scraping, and API development.

PostgreSQL
Proficient in PostgreSQL for designing, managing, and querying relational databases. Experienced in writing efficient SQL queries, performing data manipulation, and working with structured data to support data analysis and application development.

Data Analytics
Skilled in data analytics, including data cleaning, transformation, and visualization to extract meaningful insights. Experienced in using analytical tools and statistical techniques to interpret data, identify trends, and support data-driven decision-making.

Projects

2025

ReyPlot (A Python Plotting Library)

ReyPlot is a Python plotting library developed to provide a simple, intuitive, and efficient way to create data visualizations. Designed with usability in mind, ReyPlot enables users to generate a variety of plots with minimal code while maintaining flexibility for customization.

Although still under development, the library is fully functional and supports essential plotting features, making it a valuable tool for quick data exploration and visualization in Python projects. ReyPlot reflects hands-on expertise in Python development, library design, and visualization techniques, highlighting the ability to build robust software tools from the ground up.
